

AI Engineering. Understood.

Grokkers combines a comprehensive AI **learning platform** with **scheduled expert-led** learning sessions and rigorous **competency validation**.

Corporate Cohorts

Public Cohorts

Colleges & Universities

*"Not just access to AI content — **a guided, expert led** journey toward real capability."*

The Grokkers Learning Model

Grokkers

An **ANI Maarga** Solutions Initiative

*The flexibility of an LMS. The depth of **faculty-led** learning.*

01

LEARN

Learn at your own pace through the Grokkers LMS.

Videos · Explainers · eBooks · Flashcards · Hands-on Labs · Quizzes · Assignments

02

ENGAGE

Join scheduled faculty-led sessions with an experienced AI educator.

Concept Deep-Dives · Demonstrations · Architecture Discussions · Q&A · Problem Solving · Project Guidance

03

PRACTICE

Apply learning through hands-on work.

Exercises · Assignments · Experiments · Projects · Assessments

04

DEMONSTRATE

Prove understanding, not just attendance.

Pass required assessments and participate in a live Grokkers Competency Review.

CERTIFY — *Certification reflects demonstrated understanding, not simply content completion.*

One Platform. Multiple Delivery Models.

Designed for cohort-based AI learning across very different audiences.

01

CORPORATE COHORTS

Role- and organization-focused programmes for developers, architects, QA engineers, data professionals, technical leaders, and managers.

Scheduled faculty sessions combined with LMS learning, hands-on work, and assessments.

02

PUBLIC COHORTS

Open-enrollment programmes for professionals seeking structured, deeper AI capability.

Self-paced LMS learning + scheduled live sessions + peer cohort + competency validation.

03

COLLEGES & UNIVERSITIES

Structured AI programmes that complement academic curricula with industry-oriented AI engineering.

Faculty-led sessions + Grokkers LMS + practical assignments + assessments + projects.

One curriculum. One learning platform. Multiple cohort experiences.

Smaller by Design. Deeper by Choice.

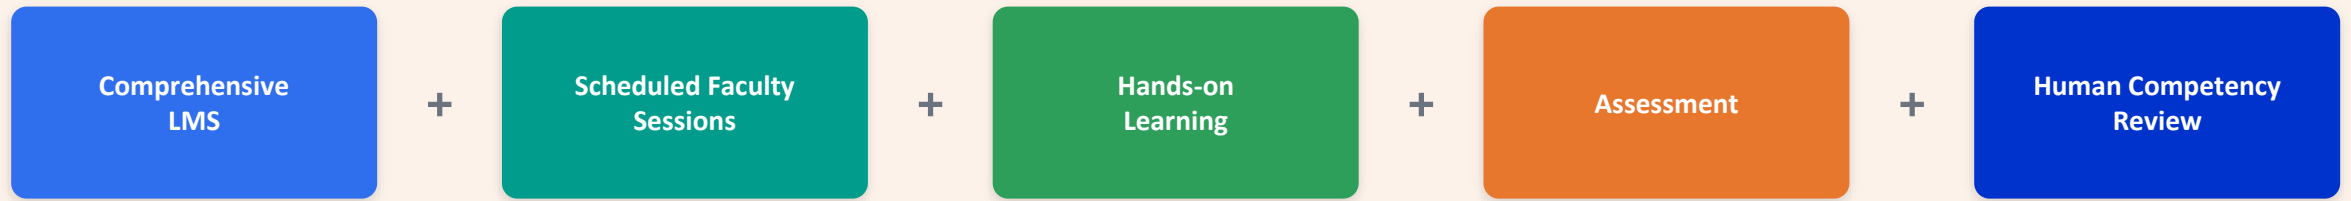

Grokkers optimizes for learning depth, not enrollment volume.

Mass Online Learning	GROKKERS
Content delivery only	Content + faculty guidance
Massive enrollment	Purposeful cohorts
Predominantly asynchronous	Asynchronous + scheduled live learning
Automated assessment	Assessment + expert validation
Completion-driven certification	Competency-driven certification

The trade-off is deliberate: mass platforms optimize for reach, Grokkers optimizes for outcomes that hold up under scrutiny.

The Grokkers Difference

What learning technology alone cannot deliver.

Learning technology provides the scale.
Faculty interaction provides the depth.
Competency validation provides the credibility.

Learn deeply. Build capability. Demonstrate competence.
